Ismail Serageldin, Ph.D., Head, Library of Alexandra, Egypt, Ronald LaPorte, Ph.D., Supercourse, Director, WHO Collaborating Center, Professor Uni. of Pittsburgh, and the BA/Supercourse team

"To get to know, to discover, to publish—this is the destiny of a scientist" (Arago).

Scientific publications and presentations are important to disseminate discoveries. They also determine your future. The more you publish and present, the better your position, the higher your raise and the greater

the chance for promotion. Academics who publish and present advance.

Scientific Publishing and presentations are a skills to master not to fear.

We will help you hone your scientific publication and presentation skills. They are not difficult but take practice. The Bibliotecheca Alexandria (Library of Alexandria) and the Supercourse, Uni. of Pittsburgh have established a free web site, with rules and tools provided by some of the leading scientists in the world to help you and your students develop Publication and presentation Skills to advance scientifically. This is a one-stop shopping center for publishing and presenting and success in Academia.

Publish Fast, Publish Frequently

If you would like to learn publication and presentation skills, please come to the Library of Alexandria at: <u>http://ssc.bibalex.org/helpdesk/introduction.jsf</u> (BA Superhelp desk. Contact me at: Ronald LaPorte, Ph.D., WHO Collaborating Centre (<u>ronaldlaporte@gmail.com</u>) (412 915 9415) The Supercourse effort is described by Dr. Serageldin in a wonderful youtube video at: <u>http://www.youtube.com/watch?v=22_CsRVbBCI</u>

Please forward to your students and friends who want to publish and present. Post this on Facebook, Linkedin, and Tweet this information to others. Also, if you know journal editors, see if they will link the help desk to their instruction for authors page. You can also find translations of this note in Russian, Arabic, Japanese, Spanish, Chinese, Japanese and Tagalog at the Library.

"Health is a state of complete physical, mental, and social well-being and not merely the absence of disease or infirmity". (WHO)
